

EMCORE Corporation Announces Preliminary Financial Results for the Fourth Fiscal Quarter Ended September 30, 2018

October 4, 2018

ALHAMBRA, Calif., Oct. 04, 2018 (GLOBE NEWSWIRE) -- EMCORE Corporation (Nasdaq: EMKR), a leading provider of advanced *Mixed-Signal Optics* products that provide the foundation for today's high-speed communications network infrastructures and leading-edge defense systems, today announced preliminary revenue for its fourth fiscal quarter ended September 30, 2018.

EMCORE estimates its revenues for the quarter to be approximately \$24.2M to \$25.2M compared to its previous revenue guidance for the quarter of a range of \$21M to \$23M. Certain principal factors that contributed to the higher than expected revenues in the quarter ended September 30, 2018 include:

- Higher levels of L-EML transmitter sales resulted in higher than expected revenues in the quarter.
- Completion of a long term agreement with a major defense prime contractor resulted in higher Navigation product shipments in the quarter.

Jeffrey Rittichier, EMCORE's President and CEO commented, "We saw a sharper rebound in CATV sales during the quarter than anticipated along with strength in our Navigation Business." Rittichier went on to say, "We shipped record volumes of L-EML transmitters in Q4, including production shipments of all of the L-EML design wins that we recently announced."

These preliminary, unaudited results are based on the most current information available to management following its initial review of operations for the quarter ended September 30, 2018, and remain subject to completion of EMCORE's customary closing procedures, including external auditor review.

About EMCORE

EMCORE Corporation is a leading provider of advanced *Mixed-Signal Optics* products that provide the foundation for today's high-speed communication network infrastructures and leading-edge defense systems. Our optical chips, components, subsystems and systems enable broadband and wireless providers to continually enhance their network capacity, speed and coverage to advance the free flow of information that empowers the lives of millions of people daily. The *Mixed-Signal Optics* technology at the heart of our broadband transmission products is shared with our fiber optic gyros and military communications links to provide the aerospace and defense markets state-of-the-art systems that keep us safe in an increasingly unpredictable world. EMCORE's performance-leading optical components and systems serve a broad array of applications including cable television, fiber-to-the-premise networks, telecommunications, data centers, wireless infrastructure, satellite RF fiber links, navigation systems and military communications. EMCORE has fully vertically-integrated manufacturing capability through its world-class Indium Phosphide (InP) wafer fabrication facility at our headquarters in Alhambra, California and is ISO 9001 certified in Alhambra and at our facility in Beijing, China.
