FOR IMMEDIATE RELEASE

**Systron Donner Inertial Receives 4-Star Recognition at Raytheon IDS
2019 Supplier Excellence Conference**

Concord, CA – June 5, 2019 – Systron Donner Inertial (SDI), for the third time consecutively, has been recognized by Raytheon Integrated Defense Systems for supplier excellence. On May 21, 2019 SDI received Raytheon’s 4-Star Supplier Excellence Award in support of the Mk54 Lightweight Torpedo Program.

Raytheon’s Integrated Defense Systems business instituted the annual Supplier Excellence Awards program to recognize suppliers who have provided outstanding service and partnership in exceeding customer requirements. Award candidates are judged on certain criteria, including overall quality and on-time delivery. (Supplier name) was one of 75 companies recognized by Raytheon’s Integrated Defense Systems business for 4-Star honors.

“SDI is honored to continuously support the Mk54 Torpedo Program, Raytheon IDS has played a big part in overall success and maturity-readiness of the SDI500 tactical grade IMU for multiple weapons systems” said David Hoyh, Director Sales & Marketing for SDI. “SDI’s mission for its growing line of tactical grade products is to deliver superior inertial bias performance under environmental conditions in smaller, lighter, more reliable, cost effective product solutions than traditional tactical grade technologies.”

For further information and specifications on the SDI500, or for information on the complete SDI product line, call +1 925-979-4500, e-mail: sales@systron.com; or visit us on the Web: www.systron.com.

Receiving the 4-Star Supplier Excellence Award for SDI from Steve Murphy, Vice President of Integrated Supply Chain (left) and John Bergeron, Vice President of Mission Assurance (right) is Lonny Louie, Quality Director (center).

About Systron Donner Inertial:

Systron Donner Inertial (SDI) is the world's leading supplier of Quartz MEMS Inertial Sensing Products and Systems providing precision systems solutions to aerospace, military and commercial aircraft, marine and land vehicular applications. Our products and systems are ideally suited for use by Integrators and OEMs. As a pioneer in the development of Quartz MEMS technology utilizing a tuning-fork design, originally introduced at the heart of the company's renown solid-state quartz MEMS sensor design, SDI is continuously developing leading-edge disciplines with new innovative breakthrough products which are enabling advanced performance in critical military and commercial Guidance, Navigation and Control (GN&C) applications worldwide.

Our experience is built on over half a century of market and technological leadership in supplying our innovative gyroscopes, linear accelerometers, inertial measurement unit and INS/GPS designs to these markets, contributing to both overall performance and establishing standards for excellent price/performance characteristics.
