### **Corporate Headquarters**

EMCORE Corporation 2015 Chestnut Street Alhambra, CA 91803 EMCORE Corporation is a leading provider of advanced *Mixed-Signal Optics* products that provide the foundation for today's leading-edge defense systems and high-speed communication network infrastructures. Our optical chips, components, subsystems and systems enable broadband and wireless providers to continually enhance their network capacity, speed and coverage to advance the free flow of information that empowers the lives of millions of people daily. The *Mixed-Signal Optics* technology at the heart of our broadband transmission products is shared with our fiber optic gyros, inertial navigation products and military communications links to provide the aerospace and defense markets state-of-the-art systems that keep us safe in an increasingly unpredictable world.

EMCORE's performance-leading optical components and systems serve a broad array of applications including navigation, military communications, cable television, fiber-to-the-premise networks, telecommunications, data centers, wireless infrastructure and satellite RF over fiber links.

EMCORE has fully vertically-integrated manufacturing capability through our world-class Indium Phosphide (InP) wafer fabrication facility at our headquarters in Alhambra, California, and at our quartz fabrication facility in Concord, California. EMCORE's various manufacturing processes involve extensive quality assurance systems and performance testing. Our manufacturing facilities have all acquired and maintain ISO 9001 certification.

EMCORE's combination of semiconductor manufacturing expertise and advanced photonics design capability has enabled us to achieve strong market presence in the Aerospace & Defense, CATV-HFC, Telecommunications, Fiber-to-the-Premise (FTTP) and Satellite Communications markets.
