**INFORMATION TO BE INCLUDED IN THIS REPORT**

**SECTION 1 - CONFLICT MINERALS DISCLOSURE**

**Item 1.01 Conflict Minerals Disclosure and Report**

In accordance with the disclosure requirements promulgated by the U.S. Securities and Exchange Commission, Emcore Corporation has prepared a Conflict Minerals Report for the calendar year ended December 31, 2015. The Conflict Minerals Report is publicly available at the following Internet website: <http://www.emcore.com/company/supply-chain-management/>.

**Item 1.02 Exhibit**

The Conflict Minerals Report required by Item 1.01 is provided as an Exhibit to this Form SD.

**SECTION 2 - EXHIBIT**

**Exhibit 1.01** - Conflict Minerals Report, as required by Items 1.01 and 1.02 of this Form SD.

**SIGNATURE**

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

**EMCORE CORPORATION**

By: /s/ Mark Weinswig

Name: Mark Weinswig

Title: Chief Financial Officer

Dated: May 27, 2016

**Exhibit 1.01**  
**Conflict Minerals Report**

**Conflict Minerals Disclosure**

I. **Introduction**

EMCORE Corporation is providing this Conflict Minerals Report (“CMR”) for calendar year 2015, as an Exhibit to Form SD, pursuant to Rule 13p-1 and Form SD (the “Rule”) under the Securities Exchange Act of 1934, as amended. The Rule requires disclosure of certain information when a company manufactures or contracts to manufacture a product and any “conflict mineral” specified in the Rule is necessary for the functionality or production of such products. Conflict Minerals are defined by paragraph (d)(3) of Form SD as columbite-tantalite (coltan), cassiterite, gold, wolframite, or their derivatives, which are limited to tantalum, tin, and tungsten, or any other mineral or its derivatives determined by the U.S. Secretary of State to be financing conflict in the Covered Countries (collectively, “Conflict Minerals” or “3TG”). The “Covered Countries” for purposes of the Rule and this CMR are the Democratic Republic of the Congo (“DRC”) and any country that shares an internationally recognized border with the DRC.

As used in this document, “Emcore,” the “Company” and the words “we,” “our,” and “us” refer to EMCORE Corporation and its subsidiaries.

II. **Overview**

**Company Profile**

Emcore designs and manufactures Indium Phosphide (InP) optical chips, components, subsystems and systems for the broadband and specialty fiber optics market. Emcore is a provider of optical components, as well as complete end-to-end solutions for high-speed communications network infrastructures enabling systems and service providers to meet growing demand for bandwidth and connectivity. Emcore's advance optical technologies are designed for Cable Television (CATV), Fiber-To-The-Premises (FTTP) networks, telecommunications and data centers, satellite communications, aerospace and defense, wireless networks, and broadcast and professional audio/video systems. With its InP semiconductor wafer fabrication facility, Emcore has fully vertically-integrated manufacturing capability and also provides contract design, foundry and component packaging services.

As described in this CMR, certain of Emcore’s operations manufacture, or contract to manufacture, products that contain Conflict Minerals that are necessary to the functionality or production of those products. However, we do not directly source Conflict Minerals from mines, smelters or refiners. We believe that, in most cases, we are several steps removed in the supply chain from these market participants, limiting our influence over their sourcing. We must therefore rely on our direct suppliers to provide information regarding the origin of necessary Conflict Minerals that are included in our products, including sources of Conflict Minerals that are supplied to them by sub-tier suppliers.

## **Conflict Minerals Policy**

Emcore is committed to responsible sourcing from its suppliers and each supplier is required to warrant that it has policies and procedures in place to determine whether parts and products supplied to Emcore are DRC conflict free (i.e., do not contain metals derived from "Conflict Minerals"). Each of our suppliers must further warrant that it has established policies, due diligence frameworks, and management systems consistent with the Organization for Economic Co-operation and Development (OECD) *Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas*. Upon Emcore's request, each of our suppliers shall permit Emcore to audit its practices and procedures and shall provide Emcore with any information reasonably requested. In addition, each supplier agrees to provide information to Emcore necessary for Emcore to comply with its conflict minerals reporting requirements, including without limitation information under the Conflict Free Sourcing Initiative Conflict Minerals Reporting Template. Our Conflict Minerals Policy is available on our corporate website at <http://emcore.com/our-company/quality-management/supply-chain-management/>

### **III. Reasonable Country of Origin Inquiry Information**

Emcore has conducted a good faith reasonable country of origin inquiry ("RCOI") to determine whether the necessary Conflict Minerals included in and necessary to the functionality of our products described under "Product Description" in Section V below originated in the Covered Countries or came from recycled or scrap sources. We engaged a leading Conflict Minerals data management consultant (the "Consultant") to assist us in conducting this RCOI.

To the extent applicable, Emcore's RCOI utilized the same processes and procedures as for our due diligence described in Section IV below. This RCOI process included conducting an inquiry of our direct suppliers using a mechanism common in the technology industry: the Conflict-Free Sourcing Initiative's ("CFSI") Conflict Minerals Reporting Template ("CMRT"). Based on the results of our RCOI, we are required to exercise due diligence on the source and chain of custody of the necessary Conflict Minerals contained in our products. Our due diligence efforts are discussed further in Section IV of this CMR.

### **IV. Due Diligence Process and Measures Performed**

Based on the results of our RCOI, the Consultant engaged by Emcore also assisted us in conducting due diligence on the source and chain of custody of 3TGs in our products. The Company's due diligence measures are designed to attempt to ascertain the facilities used to process any Conflict Minerals in our products, the country of origin of any Conflict Minerals in our products and the mine(s) or location of origin with the greatest possible specificity.

The design of our due diligence system, its conformity with an internationally-recognized due diligence framework, and a description of the measures we have undertaken to exercise our due diligence, are detailed below.

#### **(i) Conformity to a Recognized Due Diligence Framework**

Emcore's due diligence measures have been designed to conform in all material respects to the internationally-recognized due diligence framework of the Organization for Economic Co-operation and Development ("OECD") *Due Diligence Guidance for Responsible Supply Chain of Minerals from Conflict-Affected and High-Risk Areas* (Second Edition), and its related supplements. This OECD framework ("Framework") is the only due diligence framework recognized by the Securities and Exchange Commission ("SEC") to date. The Framework stresses five main areas of Due Diligence design, detailed below in IV(i)(a) - (e).

a. **Establish Strong Company Management Systems**

First, Emcore has assigned a supply chain manager to (i) manage the Conflict Minerals compliance program, (ii) liaise with the Consultant, (iii) conduct reviews of collected data, and (iv) make decisions regarding the due diligence program, including risk mitigation. Second, Emcore has requested that suppliers of goods incorporated into our products provide us with Conflict Mineral declarations for their products (*see below*, §§ IV(i)(b & c)). Third, Emcore's position statement with respect to Conflict Minerals, which is located on our website (at <http://www.emcore.com/wp-content/uploads/EMCORE-Conflict-Minerals-Policy-Statement.pdf>), encourages our suppliers to source responsibly, through their sub-suppliers and on down through their own supply chains. In this position statement, we encourage our suppliers and their sub-suppliers to use Conflict-Free Smelter ("CFS") certified smelters wherever possible, (Under the CFS program, the CFSI, an organization founded by members of the Electronic Industry Citizen Coalition ("EICC") and the Global e-Sustainability Initiative ("GeSI"), is taking action to address responsible sourcing, using independent third-party audits to identify smelters and refiners that have systems in place to assure sourcing of only conflict-free materials.)

b. **Identify and Assess Risk in the Supply Chain**

To obtain chain of custody declarations from our suppliers, we utilize the CMRT described above. This CMRT is distributed to all of our suppliers, with regular and persistent follow-ups ("Escalations"), to ensure maximum compliance and feedback. The CMRT includes questions on (i) the use and origin of Conflict Minerals in our components, (ii) supplier engagement with their sub-tier suppliers, and (iii) smelters and points of origin of the constituent Conflict Minerals. The Consultant provides suppliers with guidance and requirements to prepare them ahead of time for full compliance in completing the CMRT, our principal information-gathering step on the origin, source and chain of custody of Conflict Minerals contained in components and materials supplied to us. This kit includes materials to educate suppliers about the SEC rule on Conflict Minerals, responsible supply chain management, and a letter that suppliers can use if they need to request information from their sub-tier suppliers.

The CMRT responses are only a first step in our engagement with suppliers. The responses from suppliers are then individually validated, and examined both for completeness and any internal inconsistencies between the data they provide. Any of these issues are resolved with our suppliers by phone and email. This follow-up to incomplete or inaccurate information is described further in §IV(i)(c), below.

To the extent that a completed response identified a smelter or refiner, the Company reviewed this information against the list of conflict free and "active" smelters and refiners and country of origin information published by the CFS program as well as the list of known conflict mineral processing facilities published by the U.S. Department of Commerce. The Company also attempted to ascertain whether the smelter or refiner information provided was specific to the products supplied to the Company to determine whether the identified smelters are in the Company's supply chain.

c. **Design and implement a Strategy to Respond to Identified Risks**

As outlined above, we have developed processes for Escalations and supplier engagement. This allows us to direct needed questions and follow-up to suppliers based on their varying responses to the CMRT. Escalations are used when, among other issues, suppliers are late in responding, have incomplete information, provide feedback inconsistent with prior responses, or when other issues are identified. An Escalation may include individual written requests for information, conference calls and meetings. Each Escalation is dated and tagged in our data management system, for a variety of further actions. These actions might include direct supplier contact through our business channels, changes of scope of the diligence request, reformatting supplier responses into the correct format, time extensions for delayed responses, follow-up with alternative contacts in the supplying organization, or the dropping of outdated component parts from the Emcore products list. The readiness of suppliers to provide data is assessed and scaled in our diligence logs, and these scores may factor into decisions made by Emcore when awarding future supply contracts.

d. **Carry Out Independent Third Party Audit of Supply Chain Due Diligence at Identified Points in the Supply Chain**

Because the Company does not source 3TG directly from smelters or refiners, we rely on third parties, including the CFSI, to coordinate and conduct third party audits of these facilities. The Company utilizes the published results of these third-party audits to determine whether a specified smelter or refiner processes 3TG that directly or indirectly finance or benefit armed groups.

e. **Report on Supply Chain Due Diligence**

Our Form SD and this CMR are both available under “Supply Chain Management” in the Company section of our website at <http://www.emcore.com/company/supply-chain-management/>. Emcore will file a Form SD (and CMRs, as necessary) with the SEC on an annual basis, pursuant to Rule 13p-1 of the Securities Exchange Act of 1934, as amended.

**V. Product Description; Processing Facilities**

**Product Description** - Currently, EMCORE’s business is of a broad portfolio of compound semiconductor-based products for the fiber optics markets.

- Laser/Photodetector Component Products

These include lasers, photodetectors, and various forms of packaged subassemblies, bare die (or chip), transmitter optical subassemblies (TOSA), distributed feedback (DFB) lasers, positive-intrinsic-negative (PIN) and avalanche photodiode (APD) components for 10 Gb/s Ethernet, InfiniBand, FTTP, and telecom applications.

- Cable Television (CATV) Products

These include forward and return-path analog and digital lasers, photodetectors and subassembly components, broadcast analog and digital fiber-optic transmitters, and quadrature amplitude modulation (QAM) transmitters and receivers.

- Fiber-To-The-Premises (FTTP) Products

These include FTTP components and subsystem products to support plans by telephone companies to offer voice, video, and data services through the deployment of new fiber optics-based access networks, including passive optical network (PON) transceivers, radio frequency over glass (RFoG) optical transceivers, analog fiber optic transmitters for video overlay and high-power erbium-doped fiber amplifiers (EDFA), analog and digital lasers, photodetectors and subassembly components, analog video receivers, and multi-dwelling unit (MDU) video receivers.

- Satellite Communications (Satcom) Products

These include transmitters, receivers, subsystems, and systems that transport wideband radio frequency and microwave signals between satellite hub equipment and antenna dishes.

- Video Transport Products

These include video, audio, data, and RF transmission systems.

- Defense and Homeland Security Products

These include fiber optic gyro components used in commercial and military applications, high-frequency RF fiber optic link components for towed decoy systems, optical delay lines for radar systems, erbium-doped fiber amplifiers, pulse lasers for light detection and ranging (LIDAR) spectroscopy systems and other products.

**Processing Facilities** - Based on our RCOI or due diligence process, as applicable, and the information received from our suppliers, the facilities listed on Annex A were identified by the Company's suppliers as the smelters and refiners that processed the 3TG present in and necessary to the functionality of products manufactured by the Company in the calendar year 2015.

Due to our position in the supply chain, which we discuss above, we rely on our suppliers for accurate smelter and refiner information. Our due diligence measures cannot provide adequate certainty regarding the source and chain of custody of the necessary Conflict Minerals contained in our in-scope products. The information from our suppliers is still evolving and may contain company level declarations. As such, this smelter list is presented in good faith as the best information we have to date. This list may contain smelters that are not in our supply chain and there may be other smelters not yet identified in our due diligence process. We will continue to update the list as our information and the relevant third-party data from CFSI, LBMA, and RJC improves.

## **VI. Future Due Diligence**

We will continue to communicate our expectations and information requirements to our direct suppliers. Over time, we anticipate that the amount of information globally on the traceability and sourcing of the necessary Conflict Minerals in our products will increase and improve our knowledge. We will continue to make inquiries to our direct suppliers and undertake additional risk assessments when potentially relevant changes in facts or circumstances are identified. If we become aware of a supplier whose due diligence needs improvement, we may continue the trade relationship while that supplier improves its compliance program. We expect our suppliers to take similar measures with their suppliers to ensure alignment throughout the supply chain.

In addition to those above, the Company will undertake the following steps during the next compliance period:

- Continue to collect responses from suppliers using the most recent revision of the CMRT.
- Engage with suppliers that did not provide a response in 2015 or provided incomplete responses to help with our data collections for 2016.
- Monitor and track performance of risk mitigation efforts.
- Compare and validate RCOI results to information collected via independent conflict-free smelter validation programs such as the CFSI.

## Annex A

\* The information in this column is based on smelter or refiner information made publicly available by CFSI as of May 19, 2016. The terms used have the following meanings:

- “Compliant CFS” means that a smelter or refiner participates in and has been listed as “compliant” by the Conflict-Free Smelter Program (“CFSP”).

- “Not-Determined” means that a smelter or refiner has not been listed as “compliant” by the CFSP but may be in one of the following additional categories: (i) listed on the CFSP’s “Active” list, meaning that the smelter or refiner has committed to undergo a CFSP audit or is participating in one of the cross-recognized certification program (LMBA Responsible Gold Certification or Responsible Jewelry Program Chain-of-Custody Certification); (ii) listed on the CFSI Standard Smelter Names tab but is not listed as “Compliant” or “Active” (iii) smelter or refiner declared by the suppliers that are currently under investigation by the Consultant for certification status and legitimacy.

## APPENDIX I - Countries of Origin

The information provided in this Appendix is based on the information collected from our suppliers and is provided in good faith. We will continue to update it as our due diligence process and third party data evolves.

Angola	France	Portugal
Argentina	Germany	Republic of Congo
Australia	Guyana	Russia
